ABOUT US

AnazaoHealth is a specialty compounding pharmacy focusing on Wellness, Pain Management and Nuclear Medicine. Founded in 1997, we have been focusing on leading the future of compounding for over 25 years. Patient safety and quality is and has always been our primary concern.

We have a 30,000-square-foot 503B FDA-Registered Outsourcing Facility in Las Vegas and a 46,000-square-foot traditional 503A compounding pharmacy in Tampa. Both facilities have the appropriate licensure to conduct business in all 50 states, the District of Columbia, and selected U.S. territories (AL and ND patient-specific only).

AnazaoHealth compounds preparations for Age Management, Weight Management, IV Therapy, Sexual Health, Vitamin Injections, Hormone Replacement, Hair Care Solutions, Aesthetics, Pain Management, Nuclear Medicine and more.

A woman with blonde hair in a braid, wearing a grey tank top and teal and black striped leggings, is sitting on a sand dune. She is looking out over a desert landscape at sunset. The sky is orange and yellow, and the mountains in the background are silhouetted against the light. The text "We have developed a culture that is focused on the quality of products produced" is overlaid on the image in a white, italicized font.

*We have developed a culture
that is focused on the quality
of products produced*

HISTORY

Since the company's founding in 1997, AnazaoHealth (then operating as Genesis Pharmacy Services) recognized a national need for high-quality compounded bioidentical hormones and age management preparations. Anazao is the transliteration of an ancient Greek word that means "to come to life again." Our name, AnazaoHealth, demonstrates what we do: we work to improve our patients' quality of life. Today, AnazaoHealth is one of the largest nationwide compounding pharmacies, servicing thousands of physicians and hospitals around the country. AnazaoHealth operates a 503A Compounding Pharmacy as well as a 503B FDA-Registered Outsourcing Facility. AnazaoHealth is one of several Fagron North America companies. Together we create the future of personalizing medicine.

AnazaoHealth's Wellness Pharmacy Division provides patient-specific and office use compounded medications, not commercially available. We create customized medications and compounded pharmaceuticals, dietary supplements and hormones for individual patients under physician care. Our compounded therapeutics are personalized and individually tailored to meet the needs of your patients.

SUBMITTING A VALID PRESCRIPTION FORM

Required Elements of a Legal Prescription:¹

Florida regulations require the following information to be included on prescriptions when prescribing medicinal drugs. Please ensure all requirements are met prior to submitting the prescription. Prescriptions submitted that are missing any of the required information may result in delays in processing the order.

- Name of prescriber
- Address of prescriber
- DEA number of prescriber (if controlled substance is prescribed)
- Patient name
- Patient physical address (if controlled substance is prescribed) P.O. Box is NOT acceptable
- Drug name, strength, and quantity to dispense
- Instructions for use
- Signature of prescriber (original signature is required if controlled substance is prescribed - NO STAMP SIGNATURE)
- Date of issue or date prescription signed

- If the prescription is for a compounded formula, that needs to be indicated on the prescription. A statement explaining that the patient requires the compounded product should be included (e.g, "By submitting this prescription, I acknowledge that after evaluating commercially available drug product options, I have determined that this compounded preparation is clinically necessary for this patient").²

Different prescriptions can be submitted using the following methods:

Non-controlled Rx – electronic, FAX, or verbal order

Schedule III-V – electronic, FAX, or verbal order

Schedule II – Intrathecal use only- FAX or electronic

Schedule II – electronic or hand written (hand written prescriptions must be mailed and received by the pharmacy prior to processing)

Faxed prescriptions must be sent from the doctor's office to the pharmacy. We cannot accept prescriptions faxed to us by the patient. Please include in your fax header information such as the organization name, submission date, and FAX number. Missing fax header information may delay processing due to sender verification.

PHONE

Call **800-995-4363** to speak with a customer service, pharmacy technician.

FAX

Fax toll-free: **800-985-4363** (503A Prescriptions)
800-238-8239 (503B Prescriptions) for submission.
We will reach out if additional information is needed.

MYANAZAO

Our online portal gives you the opportunity to write, track, and order for your patients.

Email is not an acceptable way to submit prescriptions. We cannot accept prescriptions through email.

Electronically applied signatures are NOT acceptable as legal signatures when prescribing controlled substances unless the prescription is submitted to the pharmacy electronically. Controlled substance prescriptions generated using computer software, printed, and faxed to the pharmacy must have original "pen to paper" signature. Stamps, photocopies, or electronic images of signatures are not acceptable.

Your state may have additional prescribing requirements. Pharmacies are required to follow the regulations of the state where the drug is dispensed AND the state where the drug is shipped.

If the following optional information is available, please provide it to us as it helps our daily controlled substance reporting to the states.

- Patient driver's license number
- Patient SSN
- Prescriber's NPI number

¹ This is for your information only and does not constitute legal advice. We tried our best to keep it updated but make no representation as to the accuracy or completeness.

² This is a requirement from the FDA. For more information, refer to FDA guidance at <https://www.fda.gov/media/98973/download>.

What is a 503A COMPOUNDING PHARMACY?

Regulated and inspected by State Boards of Pharmacy, our traditional compounding pharmacy focuses on compounding patient-specific preparations pursuant to a prescription for individual patient use. In addition to being regulated by all State Boards of Pharmacy, we are also compliant with USP Chapters <795> & <797> and provide independent third-party validation on all compounded preparations.

- Patient-Specific Preparations
- Regulated/Inspected by State Boards of Pharmacy
- Independent Third-Party Validation
- USP Chapters <795> & <797> Compliant

What is a 503B OUTSOURCING FACILITY?

Regulated and inspected by the FDA as well as most State Boards of Pharmacy, our FDA-Registered Outsourcing Facility focuses on offering greater flexibility and access to Office Use medication for your facilities with the production of larger batches of medication. Our Outsourcing Facility operates pursuant to current Good Manufacturing Practices (cGMP).

- Office Use Medication
- Regulated/Inspected by FDA as well as most State Boards of Pharmacy
- cGMP Facility
- Independent Third-Party Validation

Quality You Can Trust

AnazaoHealth's 503A compounding pharmacy in Tampa, FL focuses on patient-specific preparations serving the Wellness, Pain Management and Nuclear Medicine pharmacy markets. The pharmacy is appropriately licensed in all fifty states, the District of Columbia, and selected U.S. territories.

We have a quality oversight program that we believe is a compounding pharmacy industry leader. This oversight program allows us to meet or exceed all USP <797> sterile compounding and USP <795> non-sterile compounding standards. In addition to the USP compounding standards, we perform both internal and external audits to validate our quality assurance processes. Our sterile compounding process involves no fewer than four different validation checks prior to completion of an order and makes extensive use of bar code technology, reducing chance of human error.

In 2014, AnazaoHealth, Las Vegas registered with the FDA as a 503B Outsourcing Facility. Outsourcing Facilities are required to comply with Section 503B of the FD&C Act and the corresponding guidance set forth by the FDA (Current Good Manufacturing Practice - Guidance for Human Drug Compounding Outsourcing Facilities Under Section 503B of the FD&C Act). The cGMP guidance requires proper design, monitoring, and control of manufacturing processes and facilities, and ensures that products are made with a higher-level of quality than what is required by USP <797>.

We have developed a culture that is focused on the quality of products produced. Each person is accountable for maintaining a high level of quality throughout the process.

AnazaoHealth, Las Vegas, is appropriately licensed to ship office use products to most states, District of Columbia and selected U.S territories. (Patient-Specific only in Alabama and North Dakota)

AESTHETICS

Non-surgical pro-active care of the skin

Skin care is a major target of the cosmetic “anti-age” treatment. Young skin is flexible, elastic, smooth and well hydrated. The aging process modifies the skin’s characteristics quite visibly with lines, wrinkles, discoloration, thinning, and loss of elasticity. It is often the skin’s appearance that first makes us aware of our age.

The skin is our largest organ and functions as a protective covering, a sensing organ, an oil producer and an organ of elimination (through evaporation and perspiration, it clears toxins from the body). If any of the structures in the skin are not working properly, a rash or abnormal sensation is the result. The whole specialty of dermatology is devoted to understanding the skin, what can go wrong, and what to do if something does go wrong.

Aesthetics is devoted to treating the dermis (non-surgically) and becoming pro-active in the care of the skin.

It is important to protect the skin against damage to maintain its elasticity, appearance and overall health. Preventive methods include a healthy diet, supplements, daily moisturizing,

sunscreens, refrain from smoking or excessive alcohol use, and the use of sun filters/blockers against UV light (hats, visors, sunglasses, etc.).

If damage has occurred, treatments in the forms of anti-wrinkle, skin renewal, moisturizing and barrier repair are available to help stimulate the skin’s natural production of collagen to help restore the structure of the skin and smooth out wrinkles. These treatments will usually contain peptides and growth factors.

- **Hydroquinone Lighting Agent** - A topical whitening agent that is considered to be the “gold standard.” Available in a variety of strengths with normal ranges between 2% to 20% and can be combined with Kojic Acid and steroids.
- **Kojic Acid** - A whitening agent created from several fungi species that inhibit the formation of pigment.
- **Tretinoin Solution** - A topical form of Vitamin A used to help the skin renew itself and can be used to treat age spots, liver spots, sunspots, and solar lentigines.

IV & Injections

- Ascorbic Acid Injection (PF/Non-Corn)²
- Ascorbic Acid Injection (Preserved/Non-Corn) MDV
- B-Complex Injection (Thiamine HCl / Riboflavin / Pyridoxine HCl / Niacinamide / Dexpanthenol)
- Phosphatidylcholine / Sodium Deoxycholate Injection* (PC / DC)^{1,2}
- PlenishIV™ Nutrient Cocktail²
- M.I.C. + Vitamin B12 Injection (Methionine / Inositol / Choline / Cyanocobalamin)
- Vitamin D3 in Olive Oil Injection*¹

Lightening Agents*

- Gluththione Injection² (PF)
- Gluththione Injection² (Preserved)
- Hydroquinone Topical Cream (Hydroquinone / Kojic Acid / Tretinoin / Hydrocortisone)
- Hydroquinone / Kojic Acid / Tretinoin / Triamcinolone Topical Cream

Chemical Peels*

- Glycolic Acid Chemical Peel
- Lactic Acid Chemical Peel
- Salicylic Acid Chemical Peel

Topical Solutions*

- Ascorbic Acid Topical Cream (Ascorbic Acid / Hydroquinone / Kojic Acid / Tretinoin)
- Ascorbic Acid / Coenzyme Q-10 / Estriol / Lipoic Acid / Pregnenolone - TopiCLICK®²
- GlucoFirm™ (Metformin HCl / Resveratrol in Pentravan® Plus) Topical Cream - TopiCLICK®
- GlucoFirm™ +D3 (Metformin HCl / Resveratrol / Vitamin D3 in Pentravan® Plus) Topical Cream - TopiCLICK®
- NAD Topical Cream
- ResveraVan™ (Resveratrol in Pentravan®) Topical Cream - TopiCLICK®
- Spironolactone Topical Cream TopiCLICK®

Numbing Agents*

- BLT Cream (Benzocaine / Lidocaine / Tetracaine)
- BLT Cream (Benzocaine / Lidocaine / Tetracaine / Phenylephrine HCl)
- TriDermaCaine™ BLT Cream (**For Office Use**) (Benzocaine 20%, Lidocaine 6%, Tetracaine 4%)

Wart Removal*

- Cantharidin Liquid 0.7%
- Cantharidin Liquid Plus Available in 0.7% or combination of Cantharidin 1%, Podophyllin 5% and Salicylic Acid 30%

¹Not available in CA.

²Ships Refrigerated

*Patient-specific prescriptions required in order to dispense. A physician must determine a compounded preparation prescribed is appropriate for a patient and document accordingly in the patient’s medical record.

A close-up, slightly blurred photograph of a man with a beard and short dark hair, wearing a blue crewneck sweater. He is smiling and looking down and to the right. The background is out of focus, showing warm, indoor lighting.

HORMONE REPLACEMENT THERAPY

The leader in high-quality Hormone Replacement Therapy solutions since 1997

Like all medical therapies, Hormone Replacement Therapy (HRT) may not be appropriate for all patients. Both the benefits and potential risks of the therapy should be discussed with your physician before beginning treatment.

Test for Hormone Levels

Given the current literature and sensitivity to the issues relating to HRT, the practice of routinely prescribing hormones without the appropriate testing for levels is highly questionable. To be accurate, testing should include levels of free (bioavailable) hormones that are more significant indicators of true deficiency or imbalances. Testing choices include serum (blood) or saliva tests.

Prescribe the Right Dosage

Use hormone baseline test results to prescribe hormone replacement therapy to bring your patient's hormones to their optimum targeted levels. Then, monitor hormone levels with periodic follow-up visits and re-testing to assess the effectiveness of the therapy and adjust as necessary.

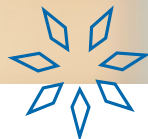

Estrogen Replacement Therapy (ERT)

Estrogen Replacement Therapy (ERT) restores declining hormone levels associated with menopause (women with a personal history or a family history of breast cancer may not be candidates for estrogen replacement). The principal estrogens in a woman are estrone (E1), estradiol (E2), and estriol (E3). Estradiol is the most potent of these estrogens and is produced by the ovary.

Estrone and estriol are both metabolites of estradiol and are less potent, with estriol being the weakest. The most common form of ERT is a compounded formulation of Bi-Est (80% estriol / 20% estradiol) and Tri-Est (80% estriol/10% estradiol/10% estrone). The percentages of estrogen in each compound can be adjusted based upon test results to achieve an optimal patient outcome.

Progesterone Replacement Therapy

Progesterone (P4) is a hormone produced in women by the adrenal glands, the ovaries and in the placenta during pregnancy. In men, smaller amounts of progesterone are produced in the testes and adrenal glands. Progesterone interacts with and mediates estrogen. Progesterone is known as a precursor hormone for estrogen, luteinizing hormone, and testosterone, among others. To a certain extent, progesterone controls the production of these other hormones and can help balance any deficiencies or excesses of them in your body. In addition to helping relieve the symptoms of menopause and PMS, progesterone is known to enhance energy and sexual libido, and to heighten feelings of well-being. Progesterone should not be confused with progestin. Progestin is a synthetic chemical and is unable to synthesize other hormones or help our bodies produce the other hormones it needs to function at

full potential. Progesterone can be administered orally (powder or micronized in oil base as capsules, oral drops, or sublingual tablets), vaginally or rectally (with suppositories), through injections or topically with transdermal creams or gels.

Testosterone Replacement Therapy (TRT)

Testosterone, although a primary male hormone, also plays a role in women's health. A decline in testosterone levels in men may be indicated by symptoms including loss of libido, erectile dysfunction, deterioration in ability to concentrate, poor muscle tone and strength, lack of endurance and mood swings. A decline in testosterone levels in women may accompany a decreased libido, irritability, weight gain, loss of lean muscle and osteoporosis. Testosterone contributes to higher energy levels and overall sense of well-being, increases lean body mass, and helps in building strong bones.

For people not producing high enough levels of testosterone, Testosterone Replacement Therapy (TRT) may be appropriate. This therapy should be considered when hormone deficiency has been clinically proven through laboratory testing of blood serum or saliva.

Testosterone can be administered orally, topically (through creams or gels), or via pellet implant (which is a pellet placed underneath the skin) or injectable. The oral route is not considered to be a primary method of delivery. Topical application of testosterone is usually the preferred method for TRT. AnazaoHealth offers

testosterone creams, gels, pellets and injectables in a variety of strengths. There are different advantages associated with different dosage forms, so the physician should discuss with the patient to identify the appropriate dosage form that would most effectively promote patient compliance.

Hormones for Men & Women

- **DHEA** – An adrenal cortex steroid hormone that raises levels of sex hormones and has been linked to increased lean body mass, improved immune and cognitive functions and skin tone.
- **Estrogens** – The primary female hormones consisting of Estradiol / Estrone/ Estriol – Biest or Triest.
- **Melatonin** – Helps regulate a good sleep/wake cycle and is recognized as a powerful free radical scavenger.
- **Pregnenolone** – a steroid hormone produced by the adrenal glands and synthesized directly from cholesterol. It is a precursor hormone, from which all other steroid hormones are made.
- **Progesterone** – An ovarian hormone that helps maintain menstrual cycles, PMS and mediates other hormones.
- **Testosterone** – The primary male hormone.
- **Thyroid** - the thyroid gland secretes two hormones, T3 and T4 which helps to regulate metabolism. The thyroid-stimulating hormone (TSH) is produced by the pituitary gland which prompts the thyroid to produce T3 and T4.

503A Patient-Specific Preparations

- Anastrozole Capsule
- Clomiphene Citrate / DHEA Capsule
- Clomiphene Citrate / Vitamin D3 Capsule
- Clomiphene Citrate / Magnesium Oxide Capsule
- Clomiphene Citrate / Zinc Oxide Capsule
- DHEA Capsule
- Estradiol Valerate Injection in Castor Oil
- Gonadorelin Acetate Injection*
- Gonadorelin Sublingual Tablet
- Nandrolone Decanoate Injection*
- Oxytocin Sublingual Tablet
- Progesterone Capsule
- Progesterone Sublingual Tablet
- Sermorelin Injection*
- Spironolactone Topical Cream TopiCLICK®
- Testosterone Cypionate / Anastrozole Injection (Grape Seed Oil)*
- Testosterone Cypionate Injection (Grape Seed Oil)
- Testosterone Cypionate / Testosterone Enanthate / Vitamin D3 Injection* (Sesame Oil)
- Testosterone Enanthate Injection* (Grape Seed Oil)
- Testosterone Cypionate / Testosterone Propionate Injection* (Grape Seed Oil)
- Testosterone Sublingual Tablet
- T3 (Liothyronine) SR Capsule
- Compounded T3/T4 Capsule

*Not available in CA

Topical Creams / Gels

- Bi-Est (E3 & E2) Can be compounded with: Testosterone and Progesterone
- Tri-Est (E3, E2, & E1) Can be compounded with: Testosterone, Progesterone, or in combination
- DHEA
- Pregnenolone
- Progesterone
- Spironolactone
- Testosterone Transdermal Gel

Commercial Products

- Anastrozole Tablet
- Armour Thyroid Tablet
- DHEA Capsule
- Exemestane Tablet
- HGH-Genotropin® MiniQuick
- HGH-Norditropin® Flexpro Pen
- HGH-Omnitrope® Cartridge
- HGH-Omnitrope® Vial
- Melatonin Capsule
- Needles, Unifine® Pentips®
- NP Thyroid Tablet

For the products listed above on this page, patient-specific prescriptions required in order to dispense. A physician must determine a compounded preparation prescribed is appropriate for a patient and document accordingly in the patient's medical record.

503B (Office Use) List of Preparations

- Estradiol Pellet
- Nandrolone Decanoate Injection
- Testosterone Pellet
- Testosterone Pellet (Cholesterol)
- Testosterone / Anastrozole Pellet
- Testosterone Cypionate Injection (Grape Seed Oil)

Topi-CLICK® Dispensing Applicator

AnazaoHealth provides topicals in tubes, jars and **Topi-CLICK's**, a metering dispenser for prescription topicals.

Benefits of the Topi-CLICK include:

- Consistent dispensing volume
- Easy to use for all types of patients
- Easier to use than oral dosing syringes
- Domed applicator pad for application - so hands stay clean
- Available with pink, white or blue caps
- Improves compliance and reduces patient complaints
- Audible, visual and tactile click registration for user recognition
- Dispense volumes of 5 ml to 35 ml of topical creams or gels
- Patient "Refill" reminder line

PELLETS

HRT Pellets are dispensed and packaged from our FDA-Registered 503B Outsourcing Facility that adheres to cGMP guidelines to offer unsurpassed quality.

Pellet Implantation

Hormone replacement therapy in pellets are placed beneath the skin, typically in the buttocks or abdomen, to provide a reservoir for your patient. Implanting the grain-of-rice-sized pellets takes about five minutes and should be repeated every four to six months. Pellet implantation offers stronger patient compliance due to not having a daily regimen of hormone dosing.

Industry Leading Pellet Consistency:

Special machined techniques eliminate virtually all variability pellet to pellet. Every pellet is independently weighed and visually inspected to meet defined acceptance and release criteria.

Industry Leading Pellet Dating:

All pellets have a 1-year Expiration Date from the date they are compounded, which provides peace of mind when managing office use inventory for your practice. Testosterone Cholesterol Pellets have 180 days dating from the date they are compounded.

Industry Leading Pellet Safety:

All pellets are terminally sterilized with cGMP-validated electron beam sterilization processes. They are also tested by 3rd party and confirmed to meet potency and endotoxin criteria before released.

Industry Leading Pellet Packaging:

Custom-designed internal sleeve vials ensure our pellets ship to you intact. Each pellet vial has a visual indicator showing successful e-beam sterilization.

Industry Leading Service and Fulfillment:

Years of investment and workflow refinement ensure certainty of Pellet Supply. State-of-the-art custom software ensures accurate and fast order turnaround. Guaranteed customer service and processing begins the moment your order is received and continues through the time of shipment.

SEXUAL HEALTH

Erectile Dysfunction Solutions

Erectile dysfunction (ED), sometimes called “impotence,” is the repeated inability to achieve and maintain an erection of sufficient rigidity for satisfactory sexual intercourse.

First-line therapy for ED is the use of oral drugs called phosphodiesterase (PDE) inhibitors. These drugs do not create immediate erections but require sexual stimulation to attain an erection. However, oral formulations may not work for approximately 30% of the patients taking them. Patients who are not responding to first-line therapy may be offered second-line therapy.

Second-line therapy for ED is the use of Intracavernous Injection (ICI) therapy. Medications are injected in the corpora cavernosa, the erectile cylinders of the penis. ICI therapy is an effective treatment with high success rates of 85%. Injection therapy can be given as a single agent (monotherapy) or a multi-agent mixture such as Bi-mix, Tri-Mix, and Super Tri-Mix.

Injectable ED Medications:

- Tri-Mix Injection Formulas 1,2,3,4,5,6^{1,2}

Prostaglandin (E1) / Papaverine / Phentolamine

- Super Tri-Mix Injection Formulas 1,2,3,4^{1,2}

Prostaglandin (E1) / Papaverine / Phentolamine

Prostaglandin (E1)^{1,2} – used to relax smooth muscles

Prostaglandin (E1) & Phentolamine^{1,2} – causes blood vessels to expand, increasing blood flow to the penis

Sublingual Tablet Sexual Health Preparations:

Oxytocin

Sildenafil / Oxytocin

Sildenafil / Tadalafil

Tadalafil

Tadalafil / Apomorphine

Tadalafil / Folic Acid

Tadalafil / Oxytocin

Vardenafil

Topical Creams for Men and Women:

Aminophylline / Arginine / Oxytocin / Sildenafil

Aminophylline / Arginine / Oxytocin / Sildenafil / Testosterone

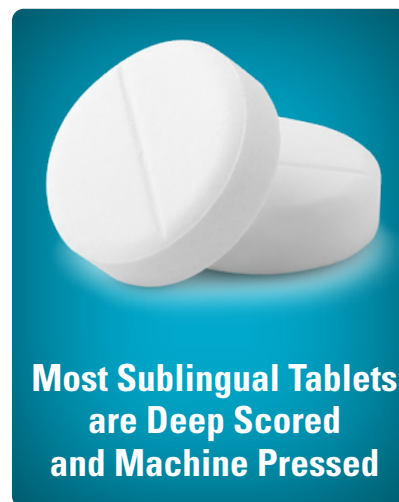

Peptide Hormone:

- Bremelanotide (PT-141) Injection– Vial^{1,2}
- Bremelanotide (PT-141) – Nasal Spray²
- Bremelanotide (PT-141) / Tadalafil – Sublingual Tablet
- Gonadorelin Acetate Injection¹
- Gonadorelin Sublingual Tablet

HAIR CARE SOLUTIONS

Scan the QR code for a scientific study on TrichoTech

AnazaoHealth's PhytoTress is a prescription hair care line with the patented TrichoTech™ technology, an intelligent phytocomplex that balances the entire hair system- Bulb, Scalp and Shaft (BSS). It is 100% natural, based on plant extracts and is free of controversial ingredients and impurities. The patented TrichoTech Technology maximizes prescription results by the physiological improvement of the cellular environment. PhytoTress product line includes five vehicles that can be used individually or in combination with certain pharmaceutical ingredients for maximum results.

Now can be compounded with: *Caffeine, Clobetasol, Dutasteride, Finasteride, Fluocinolone, Ketoconazole, Latanoprost, Minoxidil, Spironolactone, Tretinoin.*

PhytoSolRx™

(60 mL Dropper Bottle)

Option 1: Latanoprost (0.01%), Minoxidil (2% or 5%), TrichoSol™ Base

Option 2: Latanoprost (0.01%), Minoxidil (5%), Finasteride (0.25%), TrichoSol™ Base

Option 3: Latanoprost (0.01%), Minoxidil (2% or 5%), Spironolactone (1%), TrichoSol™ Base

Option 4: Latanoprost (0.01%), Minoxidil (2% or 5%), Tretinoin (0.01%), Fluocinolone (0.01%), Caffeine (2%) in TrichoSol™ Base

Option 5: Latanoprost (0.01%), Minoxidil (5%), Finasteride (0.25%), Tretinoin (0.01%), Fluocinolone (0.01%), Caffeine (2%) in TrichoSol™ Base

Option 6: Latanoprost (0.01%), Minoxidil (5%), Dutasteride (1%), Tretinoin (0.01%), Fluocinolone (0.01%), Caffeine (2%) in TrichoSol™ Base

Option 7: Latanoprost (0.01%), Minoxidil (5%), Dutasteride (1%), in TrichoSol™ Base

PhytoFoamRx™

(60 mL (2.11 oz.) Topical Foam)

Option 1: Latanoprost (0.01%), Minoxidil (2% or 5%), TrichoFoam™ Base

WEIGHT MANAGEMENT

AnazaoHealth provides preparations from our 503B FDA-registered outsourcing facility and 503A patient-specific pharmacy focused on weight management.

According to the CDC, more than one-third of adults in the U.S. are obese and more are overweight. Maintaining a healthy weight has many benefits in that it would help maintain healthy levels of blood pressure, triglyceride, and cholesterol, thus lowering risks of osteoarthritis, heart attack, stroke, and type-2 diabetes.

Weight Management Preparations

- Albuterol / Ascorbic Acid / Yohimbine HCl Capsule¹
- Carbidopa / Phentermine / Pindolol HCl Capsule¹
- Compounded T3/T4 Capsule*
- Glutamine / Arginine / Carnitine (GAC) Injection^{1,2,3}
- Lipoic Acid Injection
- Metformin HCl in Pentravan® Topical Cream (Glucovan™) TopiCLICK®¹
- Metformin HCl / Resveratrol in Pentravan® Plus Topical Cream (Glucofirm™) TopiCLICK®¹
- Metformin HCl / Resveratrol / Vitamin D3 in Pentravan® Plus Topical Cream (Glucofirm™ +D3) TopiCLICK®¹
- M.I.C. Injection (Methionine / Inositol / Choline)
- M.I.C. + Vitamin B12 Injection (Methionine / Inositol / Choline / Cyanocobalamin Injection)
- Phentermine / Topiramate Capsules SR¹
- Semaglutide / Cyanocobalamin Sublingual Tablet¹
- Semaglutide / Carnitine Injection^{1,2,3}
- Vitamin B12 Injection (Methylcobalamin)
- Vitamin B6 + Vitamin B1 Injection (Pyridoxine / Thiamine Injection)
- Phosphatidylcholine / Sodium Deoxycholate (PC / DC)^{1,2,3}
- T3 SR Capsule (Liothyronine Sodium)¹

In Alabama and North Dakota, Patient Specific Prescriptions Only.

¹ Patient-specific prescriptions required in order to dispense. A physician must determine a compounded preparation prescribed is appropriate for a patient and document accordingly in the patient's medical record.

² Not available in CA.

³ Refrigerated.

PAIN MANAGEMENT

Quality Personnel

- Dedicated Quality Assurance Team
- Onsite Microbiology Department
- Aseptic-Trained and experienced
- Continuous training, monitoring, and testing

Quality Processes

At AnazaoHealth, compounding sterile preparations is our specialty. We are appropriately licensed to provide pharmacy services in all 50 states, the District of Columbia, and selected U.S. territories. We offer a wide variety of preparations utilized by pain management physicians and clinics, physiatrists, neurologists, anesthesiologists, and hospitals.

- Multiple pharmacists ensure quality control for each prescription
- Validated and reliable compounding methods
- Our preparations undergo pyrogen and sterility testing. Sterile preparations are tested by an independent lab to ensure their identity and potency using High Performance Liquid Chromatography (HPLC)
- Validated Beyond-Use Dating
- Proprietary bar-coded software used to ensure operator accuracy

Our Preparations

Baclofen – up to 4,000 mcg/mL
Bupivacaine – up to 40 mg/mL (4%)
Clonidine – up to 6,000 mcg/mL
Fentanyl – up to 25,000 mcg/mL
Glycerin – any concentration up to 100%
Hydromorphone – up to 200 mg/mL
Ketamine – Call for available concentrations
Meperidine – up to 200 mg/mL
Methadone – up to 80 mg/mL
Morphine – up to 70 mg/mL
Phenol – any concentration up to 89%
Phenol / Glycerin Combination – up to 20% Phenol and 50% Glycerin
Ropivacaine – up to 10 mg/mL
Sufentanil – Call for available concentrations
Tetracaine – up to 20 mg/mL (2%)

These medications are available in the following forms:

Cassettes: 50 cc, 100 cc, 250 cc
Intravenous (IV) Bags: 100 cc, 150 cc, 250 cc etc.
Syringes: 10 mL, 20 mL, 30 mL, 50 mL
Vials: 2 mL, 5 mL, 10 mL, 30 mL etc.

Other Preparations

Naltrexone Sublingual Tablet (LDN) – 1.5 mg, 3 mg, 4.5 mg

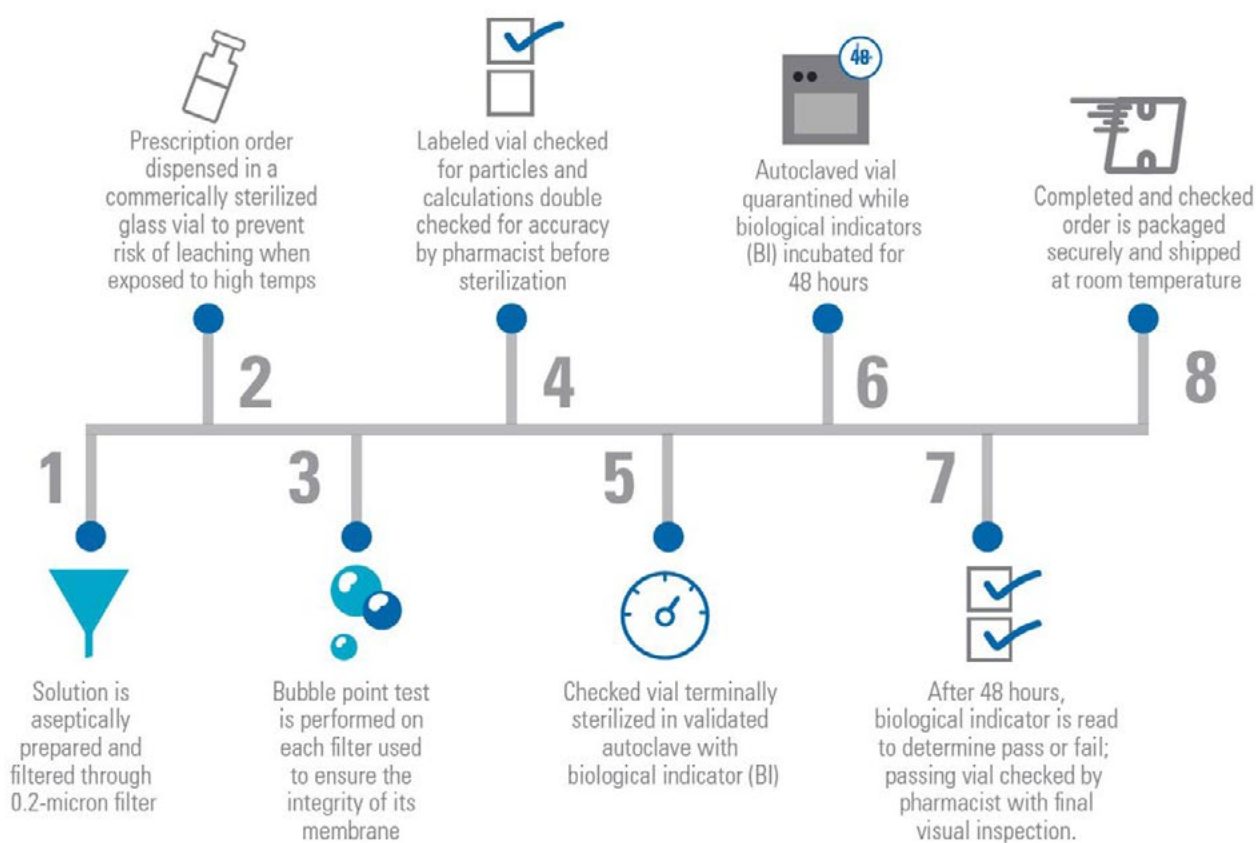

**State-Of-The-Art
Compounding
Facility**

Targeted Drug Delivery

- One of the largest Class 10,000 Clean Rooms available (ISO 7) that meet or exceed USP Chapter <797> guidelines
- Sterile cGMP-compliant full coverall
- Sterile goggles
- Sterile face mask
- Sterile gloves
- Sterile wipes in all ISO areas
- Sterile cleaning products in all ISO areas
- Sporidical used daily in all ISO 5 areas and at least twice monthly in ISO 7 and ISO 8 areas
- Air and surface sampling performed daily in all ISO 5 areas
- Potency, sterility and endotoxin test on every batch
- Onsite Microbiology Department
- Dedicated Quality Department
- Positive-pressure-controlled compounding room to reduce particles
- Certified laminar-air hoods, Class 100 (ISO 5) to provide unidirectional airflow
- Multiple High-Efficiency Particulate Air (HEPA) filters.
- Ante room and buffer room per USP Chapter <797>

The AnazaoHealth® Autoclave Process

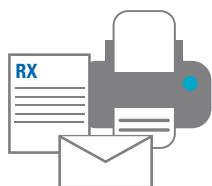

- Every terminal sterilization cycle is verified with biological indicators proving at least 10^6 sterility assurance level
- Autoclaved in glass instead of plastic, so low risk of leaching when exposed to high temperatures
- Our internal Quality Assurance Control standards, along with external 3rd party testing, ensure our preparations meet or exceed all pharmacy standards and other regulatory requirements prior to dispensing
- Quarterly summary reports outline our performance against USP Chapter <797> compounding standards
- All APIs are received from FDA registered manufacturers or suppliers

Autoclave vials not available in California.

Now Offering Terminal Sterilization in Combination with Aseptic Processing

Pain Management Process Flow

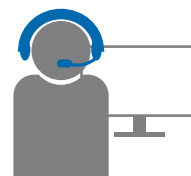

PHYSICIAN SUBMITS PRESCRIPTION

Sent in via Electronic Ordering, Fax, or Mail

ORDER ENTRY

Pharmacy Technician enters prescription order into our internal processing system

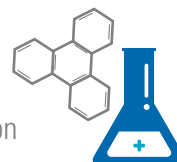

PHARMACIST VERIFIES ORDER

A Pharmacist reviews the order before sending it to compounding formulation

PHARMACIST ENTERS FORMULA

A Pharmacist enters formula for the compounded prescription in processing system

PHARMACY TECHNICIAN COMPOUNDS FORMULA

A Pharmacy Technician compounds the prescription with verification from the Pharmacist on each step

PHARMACIST PERFORMS FINAL EVALUATION

A Pharmacist performs a final verification of the formula and compounded medication

MEDICATION IS SHIPPED

The medication is sent to shipping team for shipment

NUCLEAR MEDICINE

As a healthcare professional practicing nuclear medicine, you do what is best to treat your patients while maintaining their comfort. AnazaoHealth compounds a variety of prescriptions used by nuclear medicine practitioners for diagnostic imaging. Our experienced pharmacists also strive to identify opportunities and develop solutions to create innovative preparations. Let us support you and help your patients.

Standards of Quality

- AnazaoHealth is a licensed nuclear pharmacy authorized to provide service in all 50 states, the District of Columbia and Puerto Rico.
- All radiopharmaceutical preparations undergo extensive Quality Assurance and Quality Control.
- Sterility and pyrogen testing is performed on all compounds pursuant to USP standards.

Radiation Oncology

- AminoProtect® - Amino Acid IV Bag (Lysine HCl 2.5% / L-Arginine HCl 2.5% in 1000 mL 0.9% Sterile Water Solution USP in an EVA IV Bag) - Compounded for **Office Use**, in a 503B FDA-Registered Outsourcing Facility.

Nuclear Medicine

- ACD Solution¹
- Aminophylline (Commercial Product)
- Dipyridamole (Commercial Product)
- Dipyridamole (Compounded)^{1,2}

Sincalide-CCK¹

Compounded in a unit dose vial containing 3 mcg of lyophilized Sincalide.

DMSA (Technetium-99m Kits)

Compounded in a 10ml vial containing 1.2 mg meso-2,3-dimercaptosuccinic acid

¹Not available in CA.

²Only available during commercial shortages.

Patient-specific prescriptions required in order to dispense. A physician must determine a compounded preparation prescribed is appropriate for a patient and document accordingly in the patient's medical record. AnazaoHealth does not ship radiopharmaceuticals to OR or PR.

AminoProtect will drop ship from our 503B FDA-Registered Outsourcing Facility, sister company, in Wichita, KS.

INDEX- COMPOUNDS

503A COMPOUNDING PHARMACY

Albuterol / Ascorbic Acid / Yohimbine HCl Capsule	Other
Anastrozole Capsule	Hormone Replacement Therapy
Anastrozole Tablet (Commercial Product)	Hormone Replacement Therapy
Aminophylline / Arginine / Oxytocin / Sildenafil Topical Cream	Sexual Health Solutions
Aminophylline / Arginine / Oxytocin / Sildenafil / Testosterone Topical Cream	Sexual Health Solutions
Armour Thyroid® Tablet (Commercial Product)	Hormone Replacement Therapy
Ascorbic Acid Topical Cream (Ascorbic / Hydroquinone / Kojic Acid / Tretinoin)	Aesthetics
Ascorbic Acid / Coenzyme Q-10 / Estriol / Lipoic Acid / Pregnenolone - TopiCLICK®	Aesthetics
Azithromycin Tablet (Commercial Product)	Other
Azithromycin Tablet (blister pack)	Other
BLT Cream (Benzocaine / Lidocaine / Tetracaine / Phenylephrine HCl)	Aesthetics
B-NAD / Niacin Sublingual Tablet	Other
B-NAD (For IV Use)(Not Available in CA)	Other
B-NAD Topical Cream	Other
Bremelanotide (PT-141) Injection (Not Available in CA)*	Sexual Health Solutions
Bremelanotide (PT-141) Nasal Spray*	Sexual Health Solutions
Bremelanotide (PT-141) / Tadalafil Sublingual Tablet	Sexual Health Solutions
Cantharidin Liquid	Aesthetics
Cantharidin Plus Liquid (Cantharidin / Podophyllum Resin / Salicylic Acid)	Aesthetics
Carbidopa / Phentermine HCl / Pindolol Capsule	Other
Clomiphene Citrate / DHEA Capsule	Hormone Replacement Therapy
Clomiphene Citrate / Vitamin D3 Capsule	Hormone Replacement Therapy
Clomiphene Citrate / Magnesium Oxide Capsule	Hormone Replacement Therapy
Clomiphene Citrate / Zinc Oxide Capsule	Hormone Replacement Therapy
Clomiphene Citrate / Vitamin D3 Capsule	Hormone Replacement Therapy
DHEA Capsule (Commercial Product)	Hormone Replacement Therapy
DHEA Capsule (Compounded)	Hormone Replacement Therapy
DMSA Capsule	Chelation & Vitamin Injections
Estradiol Valerate Injection in Castor Oil	Hormone Replacement Therapy
Glutamine / Arginine / Carnitine (GAC) Injection (Not available in CA)*	Other
Glycolic Acid Chemical Peel	Aesthetics
Gonadorelin Acetate Injection	Hormone Replacement Therapy
Gonadorelin Acetate Sublingual Tablet	Hormone Replacement Therapy
HGH - Genotropin® MiniQuick (Commercial Product)*	Hormone Replacement Therapy
HGH - Norditropin® Flexpro Pen (Commercial Product)*	Hormone Replacement Therapy
HGH - Omnitrope® Cartridge (Commercial Product)	Hormone Replacement Therapy
HGH - Omnitrope® Vial (Commercial Product)*	Hormone Replacement Therapy
Hydroquinone / Kojic Acid / Tretinoin / Hydrocortisone	Aesthetics
Hydroquinone / Kojic Acid / Tretinoin / Triamcinolone Topical Cream	Aesthetics
Hydroxychloroquine Sulfate (Commercial Product)	Other
Hydroxychloroquine Sulfate Capsule	Other

503A COMPOUNDING PHARMACY cont.

Lactic Acid / Salicylic Acid	Aesthetics
Lactic Acid Chemical Peel	Aesthetics
L-Carnitine Injection (Not available in CA)	Chelation & Vitamin Injections
**Myer's Cocktail Injection Frozen (PF) (Not available in CA) (Ascorbic Acid 2213 mg / Calcium Gluconate 49.2 mg / Dexpanthenol 247.9 mg / Hydroxocobalamin 983.5 mg / Magnesium Chloride 402.4 mg / Niacinamide 98.4mg / Pyridoxine 100.3mg / Riboflavin 5-Phosphate Sodium 2 mg / Thiamine Hydrochloride 98.4 mg)	Chelation & Vitamin Injections
Melatonin Capsule (Commercial Product)	Hormone Replacement Therapy
Metformin HCl in Pentravan® (GlucoVan™) Topical Cream	Other
Metformin HCl / Resveratrol in Pentravan® Plus (GlucoFirm™) Topical Cream	Other
Metformin HCl / Resveratrol / Vitamin D3 in Pentravan® Plus (GlucoFirm™ +D3) Topical Cream	Other
Metformin HCl / Resveratrol in Pentravan® Plus (GlucoFirm™) Topical Cream - TopiCLICK®	Aesthetics
Metformin HCl / Resveratrol / Vitamin D3 in Pentravan® Plus (GlucoFirm™ +D3) Topical Cream - TopiCLICK®	Aesthetics
NAD Topical Cream	Aesthetics
Naltrexone Sublingual Tablet (LDN)	Other
Nandrolone Decanoate Injection (Not available in CA)	Hormone Replacement Therapy
Needles, Unifine® Pentips® (Commercial Product)	Hormone Replacement Therapy
NeuroReset™	Other
NeuroReset™ Plus	Other
NeuroReset™ Max	Other
NP Thyroid Tablet (Commercial Product)	Hormone Replacement Therapy
Oxytocin Sublingual Tablet	Hormone Replacement Therapy
Phentermine/Topiramate Capsule	Other
Phosphatidylcholine / Sodium Deoxycholate (PC/DC) Injection (Not available in CA)*	Aesthetics
Phosphatidylcholine / Sodium Deoxycholate (PC/DC) Injection (Not available in CA)*	Chelation & Vitamin Injections
Progesterone Capsule	Hormone Replacement Therapy
Progesterone Sublingual Tablet	Hormone Replacement Therapy
**Prostaglandin (E1) Injection (Not available in CA)	Sexual Health Solutions
**Prostaglandin (E1) Injection (Not available in CA)	Sexual Health Solutions
**Prostaglandin (E1) Injection (Not available in CA)	Sexual Health Solutions
**Prostaglandin (E1) & Phentolamine Injection (Not available in CA)	Sexual Health Solutions
Resveratrol in Pentravan® (ResveraVan™) Topical Cream	Other
Resveratrol in Pentravan® (ResveraVan™) Topical Cream - TopiCLICK®	Aesthetics
Salicylic Acid Chemical Peel	Aesthetics
Semaglutide / Cyanocobalamin Sublingual Tablet	Weight Management
Semaglutide / Carnitine Injection (Not available in CA)*	Weight Management
Sermorelin Injection (Not available in CA)*	Hormone Replacement Therapy
Sildenafil Troche	Sexual Health Solutions
Sildenafil / Oxytocin Sublingual Tablet	Sexual Health Solutions
Sildenafil / Tadalafil Sublingual Tablet	Sexual Health Solutions
Sodium Bicarbonate Injection (Commercial Product)	Chelation & Vitamin Injections
Spironolactone Topical Cream	Hormone Replacement Therapy
Spironolactone (Commercial) Tablet	Hormone Replacement Therapy
Spironolactone Topical Cream - TopiCLICK®	Aesthetics
Tadalafil Sublingual Tablet	Sexual Health Solutions

503A COMPOUNDING PHARMACY cont.
